Guerrilla Games

Dear Hiring Manager,

My name is Nell Truong, a software engineering student completing the first year of my master's degree at INP-ENSEEIH. I am seeking a 6-month internship to take place between June 2025 and September 2026 as part of a gap year plan, which is why I am writing this open application for an internship at Guerrilla Games.

Since childhood I've had a passion for video games. In 2017, this passion led me to discover Guerrilla Games through Horizon Zero Dawn. This franchise has not only fueled my imagination but also deepened my appreciation for the art and innovation in gaming. Now having acquired a strong programming background through my studies and hands-on experience, I wish to extend my knowledge and skills by entering the video game industry and contributing to the development of projects I have grown up with.

I have recently completed a 7-week internship at SNCF (France's national train company) working on an Augmented/Virtual Reality Game developed using Unreal Engine 5, which expanded my object-oriented programming skills (Blueprint and C++), UI design and taught me new ones like 3D-model rigging with Blender. Additionally, this project was conducted in a team, enhancing my abilities in communication, collaboration and team usage of version control software.

I am very motivated to apply for an internship at Guerrilla Games, firstly because of my love for the Horizon franchise, and secondly because of the company's commitment to push technical and artistic boundaries of the video game industry. As an industry leader, this pursuit of greatness in games is a goal that I value and that I would be eager to take part in.

I strongly believe that my technical skills, creativity and love for Guerilla's existing projects could be an asset for the company. I am ready to fully commit to an internship, to use my skills in groundbreaking projects and learn new ones.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills align with Guerrilla Games' goals.

Sincerely,

Nell TRUONG
